

Úkoly na 1. 6. - 5. 6.

- PS str. 25 / 2,3,4,7 – zamysli se nad slovními úlohami
- Prac. listy – procvičuj
- M. str 138/ 8
139/13 pročti si a příklady vypočítej do sešitu Š

GEO. - Přenášení úseček a střed úsečky

- M. str. 123 a 129 prostuduj + shlédni výuková videa

Matýskova matematika – geometrie pro 3. roč. - str. 55 a 56

- Do sešitu G sestroj střed úsečky AB pomocí kružítka. (Pokud jsi sledovala videa z Matýskovy matematiky, při sestrojování stačí opsat pouze část kružnic.)

1. Narýsuj úsečku AB .

2. Do kružítka vezmi vzdálenost větší než je polovina úsečky AB .

3. Kružítka zabodni do bodu A a opiš část kružnice přes úsečku .

4. Kružítka zabodni do bodu B a opiš část kružnice také přes úsečku.

5. Průsečíky kružnic spoj přímkou k – tím jsme si vyznačili **střed úsečky AB** a ještě jsme narýsovali přímkou k , která je kolmá na úsečku AB tzv. **KOLMICE**.

Můžeme říci, že **úsečka AB a přímkou k svírají pravý úhel**.

- Prac. list do G – cv. 1,2,3

37.

dělenec	dělitel	neúpl. podíl	zbytek
27	: 4	=	
53	: 8	=	
47	: 6	=	
25	: 3	=	

dělenec	dělitel	neúpl. podíl	zbytek
17	: 2	=	
35	: 10	=	
19	: 4	=	
11	: 5	=	

SOUTĚŽ :

38. a) Počítej a zapisuj neúplné podíly a zbytky :
 b) Sečti zbytky u všech devíti sloupečků :
 c) Proveď součet součtů zbytků (výsledek zapiš do rámečku) :

$14 : 4 =$ <table border="1" style="display: inline-table; width: 40px; height: 40px; vertical-align: middle;"><tr><td style="width: 20px; height: 20px;"></td><td style="width: 20px; height: 20px;"></td></tr><tr><td style="width: 20px; height: 20px;"></td><td style="width: 20px; height: 20px;"></td></tr><tr><td style="width: 20px; height: 20px;"></td><td style="width: 20px; height: 20px;"></td></tr><tr><td style="width: 20px; height: 20px;"></td><td style="width: 20px; height: 20px;"></td></tr></table>									$14 : 3 =$ <table border="1" style="display: inline-table; width: 40px; height: 40px; vertical-align: middle;"><tr><td style="width: 20px; height: 20px;"></td><td style="width: 20px; height: 20px;"></td></tr><tr><td style="width: 20px; height: 20px;"></td><td style="width: 20px; height: 20px;"></td></tr><tr><td style="width: 20px; height: 20px;"></td><td style="width: 20px; height: 20px;"></td></tr><tr><td style="width: 20px; height: 20px;"></td><td style="width: 20px; height: 20px;"></td></tr></table>									$14 : 5 =$ <table border="1" style="display: inline-table; width: 40px; height: 40px; vertical-align: middle;"><tr><td style="width: 20px; height: 20px;"></td><td style="width: 20px; height: 20px;"></td></tr><tr><td style="width: 20px; height: 20px;"></td><td style="width: 20px; height: 20px;"></td></tr><tr><td style="width: 20px; height: 20px;"></td><td style="width: 20px; height: 20px;"></td></tr><tr><td style="width: 20px; height: 20px;"></td><td style="width: 20px; height: 20px;"></td></tr></table>

--

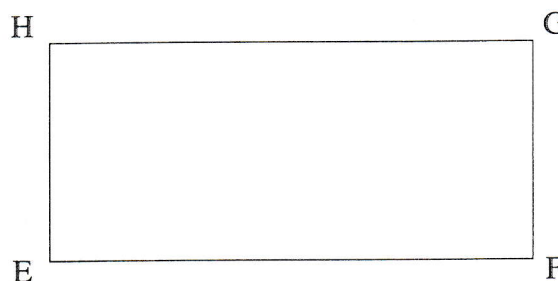

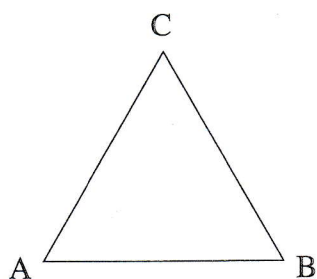

1. Pomocí pravítka nebo proužku papíru zjisti, zda je bod S středem úsečky. Pokud ano, bod S zakroužkuj.

2. Pomocí kružítka nebo proužku papíru porovnej úsečky ze cvičení č. 1.

IJ OP SH TS CD GH EF SF TS SP
 MS AB KL GH MN IJ KL AB GH EF

3. Pomocí proužku papíru sestroj středy všech stran geometrických útvarů na obrázku.

4. Doplň tajenku podle pokynů. Hledej střed úsečky.

Střed úsečky ML je .

Střed úsečky BL je . Vysvětli, co slovo z tajenky znamená.

Střed úsečky AE je .

Střed úsečky DK je .

Střed úsečky MP je .

Střed úsečky KU je .

5. Libovolným způsobem přenes na přímku s úsečky MK, PL a EU ze cvičení č. 4.
