

Úkoly pro žáky na období od 23. 3. do 27. 3. 2020

5. ročník

<u>Matematika</u>	<ul style="list-style-type: none">• 108/11 do M-Š• 109/12,13,15 do M-Š• Pracovní list – první sloupeček
--------------------------	-----------------------------------------------------------------------------------------------------------------------------------------

<u>Geometrie</u>	<ul style="list-style-type: none">• Do sešitu G narýsuj• Čtverec ABCD, $a=5$ cm, vypočítej obvod a obsah• Obdélník ABCD, $a = 5$ cm, $b = 7$ cm, vypočítej obvod a obsah• Trojúhelník – ABC, $c = 5$cm, $b= 6$cm (u jakého trojúhelníku stačí zadat 2 strany???????)• $/AB/ = 6$ cm, k (A, $r = 3$cm), l (B, $r = 3$cm)
-------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Name _____

Date _____

ADDING DECIMALS HUNDREDTHS SHEET 2

Use your adding skills to add these decimals up.

Remember: 10 tenths = 1 one (or 1 whole); 10 hundredths = 1 tenth (or 0.1).
